## Summary of fund objective

The Fund will be managed with the objective of achieving in all market environments an absolute return in excess of the return on Euro short-term money-market instruments through a combination of (i) a market neutral micro economic strategy of taking long and short positions in global equities (micro strategy) where the long positions may be held through a combination of direct investments and/or financial derivative instruments and where the short positions are held through the use of financial derivative instruments and (ii) a global macro economic strategy of taking long and short positions in global stock, bond, foreign exchange and commodity index futures (macro strategy). Short positions will be held through financial derivatives instruments. For the full objectives and investment policy please consult the current prospectus.

## Quarterly fund commentary

Global equity markets continued to rise in Q4, ending an initially volatile year on a strongly positive note. US equity markets continued their positive trend that had started after the election and further benefitted from a number of encouraging economic data prints in December. Trump's pro-growth, deregulatory and reflationary policy stance renewed investors' risk-on sentiment and fuelled the rotation into more cyclical areas of the market. The US Federal Reserve's growing confidence in its outlook for the US economy and inflation backed its decision to finally raise interest rates by 0.25%. In Europe, markets surged in the aftermath of the Italian referendum. In economic news, the ECB decided to extend its quantitative easing programme to the end of 2017. From a sector perspective, cyclical sectors such as financials performed strongly, reversing the trend observed in the early months of 2016. The Global Market Neutral strategy performed positively as stock selection worked well. Especially value-related factors contributed positively. The Financial Futures strategy also delivered positive returns with positive contributions from each asset class. Coming into 2017, the fund continues to hold long positions in equities.
