Quarterly fund commentary

Global equity markets fell in the fourth quarter to round off their worst year since the financial crisis. Markets were rattled by a myriad of concerns including the US Federal Reserve (Fed) raising interest rates too quickly, US economic growth being revised down for the third quarter, President Trump warning that he was prepared for a 'long' government shutdown if he did not receive the funding for a border wall with Mexico that he expected, as well as the UK's exit from the EU and the ongoing US-China trade talks. The fund's strategy is to look for what we view as high quality companies at attractive valuations. We seek to invest in businesses that provide an attractive yield, a sustainable and growing level of income and capital upside potential. By quality, we refer to businesses that generate high and sustainable returns. We believe that these types of companies are more likely to be able to return cash to investors in the form of growing dividends.
