Summary of fund objective

The investment objective of the Fund is to seek long term capital appreciation, measured in Yen, through investment primarily in the equity securities of companies domiciled in or exercising the predominant part of their economic activity in Japan and which are listed on any exchanges or over the counter markets. The Fund will invest in companies who make advantageous use not only of their capital but also of their intangible assets (for example, but not limited to, brand values, technical development or strong customer base). The Fund may also invest, on an ancillary basis, in debt securities convertible into common shares and other equity linked instruments. For the full objectives and investment policy please consult the current prospectus.

Quarterly fund commentary

The fund was reopened to investment by new shareholders at 12:00 (Irish time) on 16 April 2018. For more information and future updates please go to www.invescomanagementcompany.lu/lux-manco.

Japanese equities initially rose but gains proved to be short-lived as stock markets across the world then came under pressure due to concerns over a global economic slowdown, no let-up in the US-China trade spat and worries that profits could be nearing a peak among technology firms. In terms of fund strategy we continue to focus on bottom-up stock selection. We took profits from a skincare brand company which received an offer from a multinational healthcare company. We took a position in a company which owns a circuit training gym brand. Looking ahead we are monitoring global economic and political developments, such as the trade and technology war between the US and China as well as the 'normalisation' of monetary policy from central banks, i.e. raising interest rates from their historic lows. We believe that the Japanese equity market is on the right track, supported by the ongoing progress on corporate governance reform combined with companies' efforts to increase profitability. As a bottom-up stock picker, the fund continues to focus on high-quality companies with robust free cash flow, underpinned by strong intangible values such as brand, technology and customer loyalty.
