Summary of fund objective

The investment objective of the Fund is to seek long term capital appreciation, measured in Yen, through investment primarily in the equity securities of companies domiciled in or exercising the predominant part of their economic activity in Japan and which are listed on any exchanges or over the counter markets. The Fund will invest in companies who make advantageous use not only of their capital but also of their intangible assets (for example, but not limited to, brand values, technical development or strong customer base). The Fund may also invest, on an ancillary basis, in debt securities convertible into common shares and other equity linked instruments. For the full objectives and investment policy please consult the current prospectus.

Quarterly fund commentary

The fund was reopened to investment by existing shareholders only at 12 noon (Irish time) on 17 February 2016. However, the fund may still be subject to capacity constraints in the future and the Directors may need to close it to new subscriptions. For more information and future updates please go to <http://invescomanagementcompany.lu>.

Japan's equity market ended the quarter higher, buoyed by a weakening of the yen relative to the dollar after the US presidential election result. The monetary easing environment in Japan combined with the prospect of expansionary fiscal policy in the US and strengthened expectations that the Federal Reserve will increase interest rates at a faster pace than previously anticipated, saw the yen weaken sharply. During the quarter, a new holding was introduced in a leading manufacturer of entertainment products due to its strong brand and robust free cashflow. Conversely, the fund's holdings in a manufacturer of factory automation products and an Indian restaurant chain were reduced post a period of strong performance. Although we would not be surprised to see the equity market give back some of its recent strong performance, we expect it to move higher on the back of the ongoing turnaround of the Japanese economy as well as improving earnings momentum into the middle of this year. Furthermore, most investors appear to overlook the ongoing progress of corporate governance reform; thus the risk-reward ratio of some Japanese stocks looks favorable, in our view. Against this backdrop, the fund continues to focus on what we view as high quality companies with robust free cash flow and strong brands.
