FUND INFORMATION

Description

Lyxor Asset Management ("Lyxor"), a wholly owned subsidiary of the Societe Generale Group, was founded in 1998 with the aim of delivering sustainable performance solutions, offering enhanced transparency, liquidity and flexibility. With more than a decade of experience, Lyxor is a global player in four investment classes: alternative investments, ETFs & indexing, multi-asset and structured investments. Based on research and risk management, Lyxor's business model allows for the engineering of sound and innovative investment solutions. Employing more than 600 professionals, Lyxor is present in all strategic investment locations throughout the world, with offices and affiliates in Europe, Asia and North America. Lyxor brings together the responsiveness of an entrepreneurial organisation and the reliability of an expanding global player, managing over 83 B€ in global assets, 34 B€ of which are ETFs.

Exchange Traded Funds (ETFs)

A UCITS ETF is a UCITS at least one unit or share class of which is traded throughout the day on at least one regulated market or Multilateral Trading Facility with at least one market maker which takes action to ensure that the stock exchange value of its units or shares does not significantly vary from its net asset value and where applicable its Indicative Net Asset Value.

Investment Objective

Lyxor Index Fund Eurozone 300 seeks to replicate the EURO STOXX Total Return Index (net dividends reinvested). The EURO STOXX Total Return index is a subset of around 315 components of the STOXX 600 Index. It covers approximately 95% of the Total Market Index versus only 60% for the Euro Stoxx 50 Index. With a variable number of components, the index represents large, mid and small capitalisation companies of the 12 Eurozone countries.

A full physical replication process ensures tight performance replication of the benchmark. Tracking error is continuously monitored. A tax optimisation process is run continuously in order to enhance the dividend yield of the portfolio compared to its net dividend benchmark index. Entry and exit fees paid to the Fund and priced at fair value to protect the Fund's performance from transactions costs arising in subscriptions/redemptions.

Risk Factors

It is important for potential investors to evaluate the risks described below and in the fund prospectus which can be found on [www.lyxoretf.com](http://www.lyxoretf.com)

**CAPITAL AT RISK:** ETFs are tracking instruments: Their risk profile is similar to a direct investment in the Underlying Index. Investors' capital is fully at risk and investors may not get back the amount originally invested.

**REPLICATION RISK:** The fund objectives might not be reached due to unexpected events on the underlying markets which will impact the index calculation and the efficient fund replication.

**COUNTERPARTY RISK:** Investors are exposed to risks resulting from the use of an OTC Swap with Societe Generale. In-line with UCITS guidelines, the exposure to Societe Generale cannot exceed 10% of the total fund assets.

**UNDERLYING RISK:** The Underlying Index of a Lyxor ETF may be complex and volatile. When investing in commodities, the Underlying Index is calculated with reference to commodity futures contracts exposing the investor to a liquidity risk linked to costs such as cost of carry and transportation. ETFs exposed to Emerging Markets carry a greater risk of potential loss than investment in Developed Markets as they are exposed to a wide range of unpredictable Emerging Market risks.

**CURRENCY RISK:** ETFs may be exposed to currency risk if the ETF is denominated in a currency different to that of the Underlying Index they are tracking. This means that exchange rate fluctuations could have a negative or positive effect on returns.

**LIQUIDITY RISK:** Liquidity is provided by registered market-makers on the respective stock exchange where the ETF is listed, including Societe Generale. On-exchange liquidity may be limited as a result of a suspension in the underlying market represented by the Underlying Index tracked by the ETF; a failure in the systems of one of the relevant stock exchanges, Societe Generale or other market-maker systems; or an abnormal trading situation or event.

Units of a specific UCITS ETF managed by an asset manager and purchased on the secondary market cannot usually be sold directly back to the asset manager itself. Investors must buy and sell units on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying units and may receive less than the current net asset value when selling them.

Updated composition of the product's investment portfolio is available on [www.lyxoretf.com](http://www.lyxoretf.com). In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the product, and might also be mentioned on the websites of the stock exchanges where the product is listed.

There is no guarantee that the fund's objective will be met. The fund may not always be able to replicate exactly the performance of the index (or indices).

**This product includes a risk of capital loss.** The redemption value of this product may be less than the amount initially invested. In a worst case scenario, investors could sustain the loss of their entire investment.
